

Experiment: Car Booking System using Zoho Creator (SaaS)

Aim

To design and develop a Car Booking System using Zoho Creator, a cloud-based SaaS platform, that enables users to book rental cars, automatically calculates the total rental amount, and maintains booking records efficiently.

Procedure

Step 1:

Log in to Zoho Creator.

Step 2:

Click Create New Application.

Step 3:

Enter the application name as: Car Booking System

Step 4:

Create a form named: Car Booking

Step 5:

Add the following fields:

Field Name	Field Type
Name	Name
Phone	Phone
Car Model	Single Line
Cost of Rent	Currency
Number of Days	Number
Total	Currency

Step 6:

Create a workflow to automatically calculate the total rental amount.

Workflow: On User Input → Number of Days

```

if(input.COST_OF_RENT != null && input.NUMBER_OF_DAYS != null)
{
    input.TOTAL = input.COST_OF_RENT * input.NUMBER_OF_DAYS;
}

```

Step 7:

Create an On Success workflow to display a booking confirmation message.

alert " 🚗 Car Booking Successful!\nThank you for choosing our service.";

Step 8:

Create a report named: Car Booking Report to display all booking details.

Step 9:

Run the application, enter booking details, submit the form, and verify that the total amount is calculated automatically and the booking confirmation message is displayed.

The screenshot displays the Zoho Creator interface for a 'CAR BOOKING' application. On the left, a sidebar menu lists 'CAR BOOKING' and 'CAR BOOKING Report'. The main form area contains the following fields and values:

Field	Value
Name	ANU
First Name	
PHONE	+91 8123
CAR MODEL	BMW CAR
COST OF RENT	56,008
NUMBER OF DAYS	23
TOTAL	12,88,184.00

A confirmation message is displayed: "Car Booking Successful! Thank you for choosing our service." with an "OK" button. A "Submit" button is visible at the bottom of the form. The URL at the bottom of the browser window is <https://creatorapp.zoho.in/jashmithas05/car-booking#>.

Implementation

The **Car Booking System** was implemented using **Zoho Creator** forms, workflows, and reports. The system allows users to enter their personal details, select a car model, specify the rental cost and number of rental days. The total rental amount is automatically calculated based on the cost of rent and number of days using a workflow. After the booking is successfully submitted,

a confirmation message is displayed to the user. Reports are generated to store and manage all car booking records efficiently through the Zoho Creator cloud platform.
